

e-RS Connect | Advice & Guidance worklists

This is the quickest way for secondary care clinicians to view, respond to and action e-RS Advice & Guidance (A&G) worklists. As they would on the e-RS platform, the feature enables specialists to use Consultant Connect to convert the A&G request to a referral, ask for more information, or return the request with advice.

Why use e-RS Connect for A&G worklists?

Quick and easy to use, no training required

Attachments displayed on screen, no need to download

Immediate export of activity report

Do everything that you can in e-RS but 2-4 times faster

Capture bespoke data for local use
(e.g. through text fields /drop-down menus)

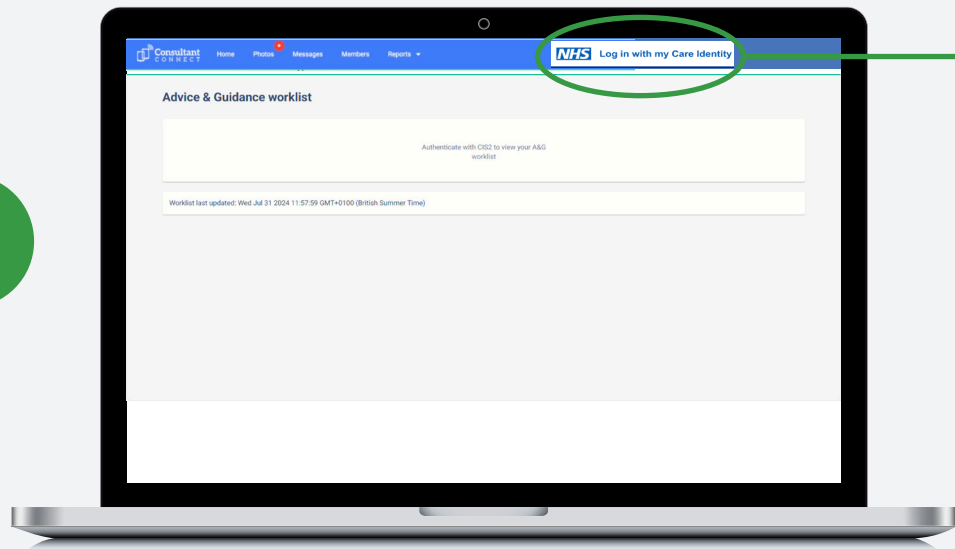

Copies of A&G stored, export to EPR (optional)

This guide explains how secondary care clinicians can quickly and easily view, respond and action their e-RS A&G worklists on the Consultant Connect platform.

How it works: e-RS Connect | Advice & Guidance worklists

1

NHS Log in with my Care Identity

The specialist opens Consultant Connect in a browser on their computer, **plugs in their smartcard** and then clicks '**Log in with my Care Identity**' on Consultant Connect to authenticate it.

2

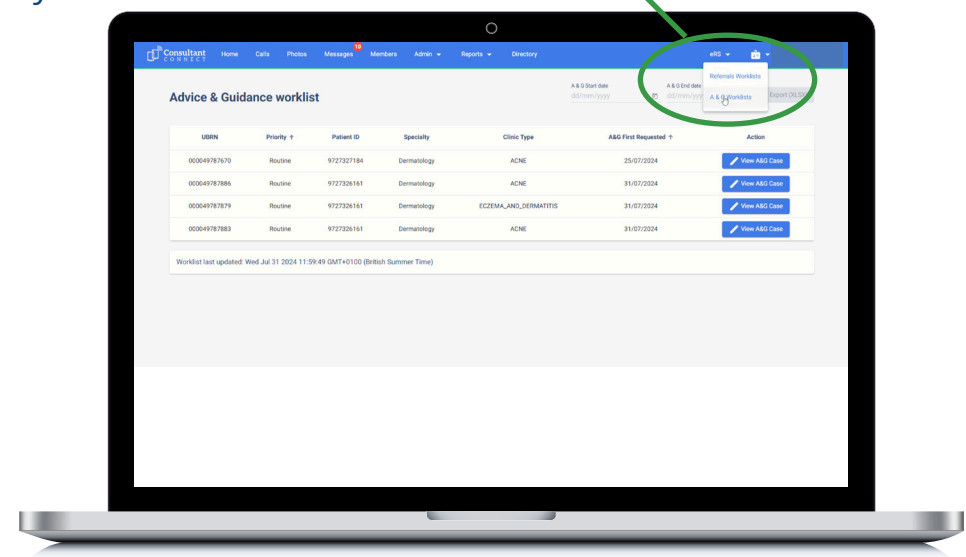

To **view their e-RS A&G worklists on Consultant Connect**, they click '**eRS**' in the main menu, and select '**A&G Worklist**'.

All of their **e-RS A&G requests** automatically display, including the:

- UBRN
- A&G priority
- Patient Identifier
- Specialty
- Clinic type
- Date the A&G query was requested

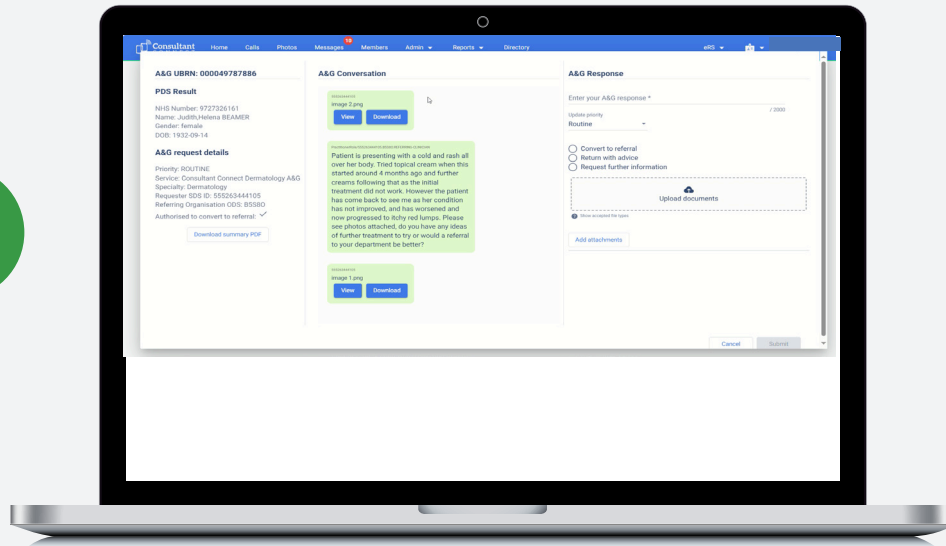

To view a case, they click:

 View A&G Case

How it works: e-RS Connect | Advice & Guidance worklists

3

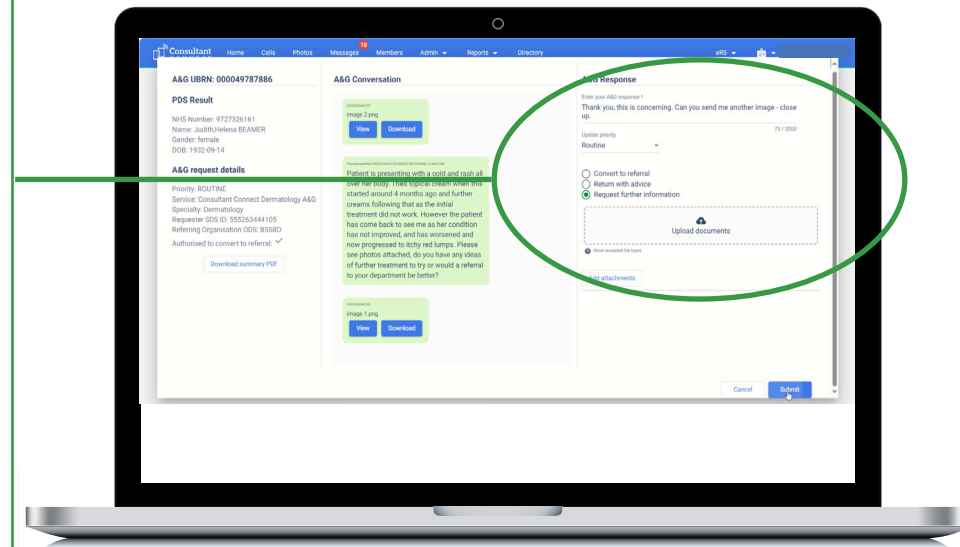

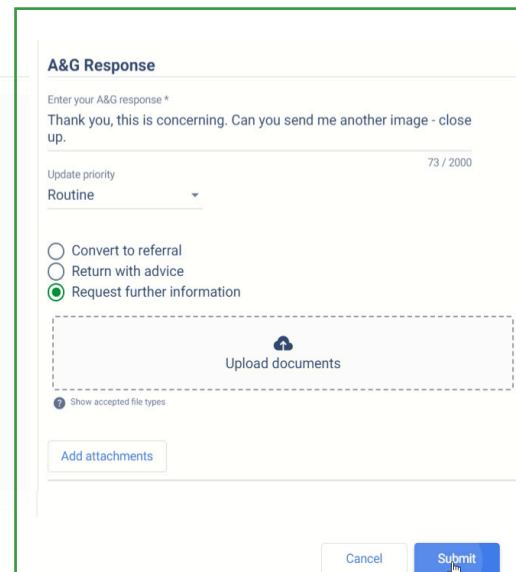

Within each case all the **A&G conversation** and **case details display**. This includes a **summary of the A&G case** and **all the patient details**.

Attachments included in the A&G request can be **securely viewed or downloaded**.

4

The user can **write a response to the A&G request**, and can **request further information, such as additional patient images**, if applicable.

How it works: e-RS Connect | Advice & Guidance worklists

5

The specialist selects an action or outcome from the options listed:

- Convert to a referral*
- Return with advice
- Request further information

*If the advice is to convert to a referral, they can add instructions for the admin team.

A&G Response

Enter your A&G response *

The is evidence that the rash has been worsening over time despite all the treatments you've tried. I'd like to see the patient face to face. We will arrange the referral.

6

Once **submitted**, the **A&G request is automatically removed** from the user's e-RS worklist both on e-RS and on Consultant Connect.

Specialists **can view and export excel reports relating to their e-RS A&G activity** via Consultant Connect. They select the relevant date range from the calendar menu, and click 'Export'.
