

# IG-Secure Clinical Photography

## The No-Hassle Way

The free Consultant Connect App allows clinicians to take IG-compliant clinical photos on their mobile phone. The photos are **not** saved to the device but instead are automatically uploaded to the patient's electronic record. All photos are also emailed to the clinician's NHS email address and saved in a secure cloud. Here, administrators can access them for saving to records and attaching to local referral systems as appropriate.

### How to sign up:

Download the Consultant Connect App from Google Play or the App Store. Follow the simple steps to sign up with your NHS email address.

Open PhotoSAF in the app, confirm patient consent and take photo(s).

Add NHS #, patient identity is verified by NHS Spine, and add any notes.

Select 'Save these photos'.

Photos will automatically integrate with the patient's record if this function is enabled in your area.

And/or

Photos are automatically sent to your NHS email address and are also available via [Consultant Connect in your browser](#).

### How to view and download saved images:

Log in to [Consultant Connect in your browser](#) using your credentials for the app and click on the 'Photos' tab in the menu bar.

Click the 'Download photos' button to export a PDF of the images to a secure location on your device. Once downloaded, you can attach images to your local referral pathway or the patient's record.
